Safety Inspections

Sapsis Rigging is the recognized leader in North America for rigging safety inspections. Since 1981 Sapsis Rigging, Inc. has conducted over 3,000 inspections of theaters, arenas, hotels, churches, theme parks and other performance-based venues.

We conduct inspections using the following criteria:

- ANSI E-Series Standards
- OSHA Regulations
- Manufacturer Specifications
- Recognized Building, Fire and Life Safety Codes
- Common Sense

A typical inspection will take 6-8 hours. The stage area should be as clear of scenery as possible to facilitate access to the stage, backstage and front of house areas.

Cost: The inspection fee is determined by the size and complexity of your facility and its equipment. In addition to the fee, you will be responsible for all travel expenses. These may include round trip coach airfare, lodging, meals, and ground transportation as required.

Quantity discounts are offered for multiple venue inspections carried out during the same trip. School districts, municipalities, and other organizations with more than one facility are encouraged to take advantage of these discounts.
